Subject: Statement of Intent for Climate Change Management Practices

I am writing this letter to express my intention to adopt management practices that take climate change considerations into account in my investment proposal. As an investor, I understand that climate change presents significant risks and opportunities that can affect my investment portfolio's long-term performance.

In light of this, I acknowledge the importance of integrating climate change considerations into my investment decision-making processes. I am committed to taking the necessary steps to manage and mitigate climate change risks in my investment portfolio and to seek out opportunities to invest in projects that contribute to a sustainable future.

To achieve this, I will undertake the following measures:

1. Conduct a climate risk assessment of my investment portfolio to identify and assess climate-related risks and opportunities.
2. Regularly monitor and report on the performance of my investments, taking into account climate-related risks and opportunities.
3. Engage with companies in my portfolio to encourage them to adopt climate change management practices and reduce their carbon footprint.
4. Disclose my climate change management practices and performance to my stakeholders, including investors, clients, and other relevant parties.

I understand that adopting climate change management practices is essential to the long-term success of my investment portfolio and the broader society. I am committed to playing my part in addressing the challenges posed by climate change and contributing to a sustainable future.

Thank you for considering my statement of intent.

Sincerely,

[Name, surname and grandfather's name]

[Position held in the company / Company name]
