Subject: Statement of Intent for Child Labor Prevention Policy Adoption

I am writing this letter to express my commitment to adopt and implement a policy to prevent child labor as part of the conditions associated with the receipt of the loan. As an investor and business leader, I recognize the critical importance of safeguarding the rights of children and ensuring that all aspects of our operations and investments adhere to international standards for preventing child labor.

In alignment with the International Labour Organization (ILO) conventions on child labor, I am fully committed to developing and adopting a comprehensive Child Labor Prevention Policy within 12 months of receiving the loan.

To achieve this, I will take the following steps:

1. **Elaboration of the Policy:** A comprehensive policy to prevent child labor will be drafted based on the ILO conventions.¹ This policy will detail clear guidelines to ensure no child labor is involved in any part of our supply chains or business operations.
2. **Implementation and Monitoring:** After the policy has been drafted, I will ensure its full implementation across all levels of the company. A monitoring and evaluation system will be set up to verify compliance and assess the effectiveness of the policy, with a focus on identifying and addressing any potential risks of child labor.
3. **Engagement with Stakeholders:** We will engage with suppliers, contractors, and business partners to ensure that they too comply with the standards outlined in the ILO conventions. Contracts and agreements will be updated to reflect these requirements.

By making this commitment, I affirm my responsibility to contribute to the global efforts to eliminate child labor and foster a sustainable and ethical business environment.

Sincerely,

[Name, surname, and grandfather's name]
